

## **OTHER ACTIVITIES**

**8548**

(No. 56 March 2006)

Many activities occur within contract counties that routinely occur in CDF units. Fire prevention, public information, law enforcement, fire plan that includes pre-fire management and vegetation management, and specialized studies and research are provided by contract counties as part of contractual and operating plan requirements and when requested by CDF. The contract counties work directly with the appropriate CDF region and/or CDF administrative unit in providing data collection and analysis for statewide reporting consistency.
